

An Integral Part of Your Business

About IT Gateway Solutions

**We are your
IT Department
... Only Better**

IT Gateway is a group of highly skilled and highly diverse Information Technology specialists.

Our super powers are in strategic IT planning, problem solving and keeping your business networks running smoothly.

We love technology, but being a great IT company is about much more than working with computers.

IT GATEWAY has made it our mission to deliver services that bring real value to each and every one of our customers, no matter how big or small. We'll give you that peace of mind and more, by implementing highly-secure systems that not only align with your business needs, but help you reduce cost, improve productivity, and ease workload. When you've got access to true IT specialists who genuinely have your best interests at heart, you're free to focus even more on growing your business. We'll be working away in the background, ensuring data safety and system availability.

About Us

Integrity

We act and advise in our clients' best interests. We are dependable: we do what we say we will do, when we say we will do it. We own up to our mistakes.

Communication

We emphasize frequent, full, honest communication as one of the pillars of a lasting and profitable business relationship.

Respect & Friendliness

We meet clients on their technological level. We are never condescending to or demeaning of our clients, even in private. We are helpful, kind, and polite, and we turn our clients into long-term raving fans. (Appropriate humor is always welcome.)

Expertise

We strive to really understand available technology, so we can advise our clients on new or developing technologies they may not be familiar with, and do so with insight and wisdom. We treat every situation as a learning opportunity, and do our best to internalize the lessons it teaches.

Client Education

Credibly brand standards compliant users without extensible services.

Team Work

We play to the strengths of our technicians, and send the right person to each job. We do our best on each project even when somebody else will end up being responsible to maintain it.

Abundance

We promote a win-win environment by giving superb value to our clients while providing an honest and bountiful living for ourselves.

Service

Administration

“We manage the systems, software, and networks that our clients rely on to keep them in business and productive.”

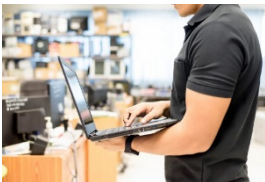

Networking

“Our expert installers can hook you up with a network that’s blazing fast and rock solid.”

Support:

“We make sure we get the right technician on the job so our solution can be as elegant as possible.”

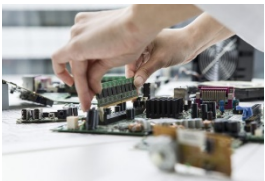

Maintenance:

“We keep technology running smoothly, preventing costly downtime.”

Consultation:

“We work with business owners, administrators, and even residential users, to develop the vision of what they want their computer systems to do”

Implementation:

“We take a project plan and turn it into a working, tested, stable system ready for production use.”

Residential Services:

Why should only businesses get the really good tech support, leaving residential customers to either fend for themselves or rely on cut-rate, sometimes untrustworthy service providers?
